

NGUYEN TUAN KIET

BACKEND DEVELOPER

Gender: Male
Phone: 0357.100.992
Email: kietnguyen23012002@gmail.com
Github: https://github.com/KietNguyen2301
Address: Thuong Duc commune, Da Nang city

OBJECTIVE

Backend Developer (Java Spring Boot, Node.js) with hands-on experience building RESTful APIs, microservices and payment integrations. AI-native in daily work: using Claude Code, Copilot and AI agents to ship faster, while carefully reviewing AI-generated code for quality and security. Seeking a Fresher/Junior Backend role to build reliable, AI-powered products and keep up with fast-changing technology.

EDUCATION

2020 - 2025

Graduated from FPT University Da Nang
Software Engineering

WORK EXPERIENCE

11/2025 - 03/2026

Startup Company – Construction Technology
Backend Developer Intern (Node.js)
Internal management system for a construction-tech company.

- **API development:** Built RESTful APIs with Node.js (Express.js) for the internal management system.
- **Database design:** Designed MongoDB collections and data structures supporting the system's core features.
- **Teamwork:** Collaborated through a Git workflow and resolved merge conflicts during development.

Tech: Node.js, Express.js, MongoDB, RESTful API, Git

05/2024 - 09/2024

FPT Software
Web Developer Intern (Java Spring Boot & ReactJS)
Full-stack web application development in an Agile/Scrum team.

- **Full-stack features:** Developed web features with Spring Boot (backend) and ReactJS (frontend).
- **API integration:** Built RESTful APIs and connected them to the frontend.
- **Business logic:** Implemented backend business logic following the MVC architecture.
- **Quality:** Tested, debugged, maintained and enhanced existing features.

Tech: Java, Spring Boot, Spring MVC, ReactJS, RESTful API, Git, Agile/Scrum

04/2026 - 09/2026

VNPT

Network Infrastructure Technician

Field deployment of network infrastructure for household and business customers.

- **Deployment:** Installed and deployed network cabling infrastructure at customer sites to company technical standards.
- **Connectivity:** Tested connections after installation to ensure stable service handover.
- **Soft skills:** Worked directly with customers and field teams; handled on-site tasks to schedule and safety requirements.

Skills: Network cabling, LAN fundamentals, connection testing, field work, customer communication

PROJECTS

07/2026 - 09/2026

Online Printing Platform for Students (Freelance)

Freelance Developer

Web platform that lets students order document printing online and pay directly on the site.

- **Ordering flow:** Built the flow for students to upload documents, choose print options and place orders online.
- **Payments:** Integrated online payment so orders are paid and confirmed automatically.
- **Hardware integration:** Connected the web system with printer hardware to process print jobs from online orders.
- **Delivery:** Worked directly with the client from requirements to deployment as a freelancer.

Tech: Java, Nginx, PayOS API, GitHub Actions (CI/CD)

12/2025 - 12/2025

Landing Pages for Clients

Frontend Developer

Landing pages built from client-provided designs.

- **Design to code:** Converted client designs into responsive landing pages faithful to the original layout.
- **AI-assisted animation:** Used AI coding tools to implement the required animations and interactions quickly.
- **Client delivery:** Iterated on client feedback and delivered pages on schedule.

05/2025 - 08/2025

CUSTOMERS – AI-integrated Real Estate Platform

Backend Developer

Real estate sales & management platform built on a microservices architecture.

- **Authentication:** Built registration/login with JWT, bcrypt, email OTP verification and user role authorization.
- **Payments:** Integrated PayOS API to process broker commission payments, improving transaction transparency.
- **Core services:** Developed broker review system with approval flow, appointment management and blog management.
- **Notifications:** Automated email notifications (Nodemailer) for multiple business workflows.
- **Architecture & DevOps:** Built independent microservices behind Nginx; set up CI/CD with GitHub Actions.

Tech: Node.js, Express.js, Prisma ORM, MySQL, JWT, bcrypt, Microservices, Nginx, PayOS API, Nodemailer, GitHub Actions (CI/CD)

01/2024 - 04/2024	**Fruit Shop – E-commerce Web Application** **Backend Developer** • **Backend & API:** Built RESTful APIs and business logic with Spring Boot following the MVC architecture. • **Database:** Designed MySQL schema with ORM and optimized queries for data integrity and performance. • **Payments:** Integrated PayOS payment gateway for online checkout. • **Collaboration:** Worked with the ReactJS frontend team on API integration. **Tech:** Java, Spring Boot, Spring MVC, ORM, MySQL, ReactJS, PayOS

CERTIFICATIONS

22/03/2026	Certification Claude Code – AI-Assisted Software Development, Skilljar | 2026 https://verify.skilljar.com/c/3bhr4cwchks6
03/11/2024	Certificates Project Management Certification, Coursera https://www.coursera.org/account/accomplishments/certificate/R1GMCG6WEJU5
03/11/2024	Certificates Project Change and Risk Management Certificate, Coursera https://www.coursera.org/account/accomplishments/certificate/TKG1SXO57M69
03/11/2024	Certificates Budgeting and Scheduling Project, Coursera https://www.coursera.org/account/accomplishments/certificate/3N4PY0EVZSNO
03/11/2024	Certificates Initiating and Planing Projects, Coursera https://www.coursera.org/account/accomplishments/certificate/0WYG5294A0CB
17/09/2024	Certificates Initiating and Planing Projects, Coursera https://www.coursera.org/account/accomplishments/certificate/0WYG5294A0CB

SKILLS

Programming languages:	Java, JavaScript
Framework:	Spring Framework, Spring MVC, Spring IoC, Spring Boot, Spring Data, RESTful API, MVC Architecture
Backend Development:	Full-stack Application Development, Backend Development, Web Application Development, Microservices, REST Web Services
Testing:	Unit Testing, Integration Testing, Software Testing, Code Quality, Debugging
Frontend Development:	ReactJS
Tools:	Git, Docker
ORM & Database:	ORM, Prisma ORM, MySQL, MongoDB, Database Design, Data Processing, Query Optimization
Office software:	Microsoft Word, Excel, PowerPoint.
Web Services & API Integration:	RESTful Web Services, REST API Development, Third-party API Integration, Payment API Integration
Authentication & Security:	JWT, Authentication, Authorization, OTP Authentication, bcrypt, Web Application Security

Software Development Processes:	Agile/Scrum, Design Patterns, Technical Documentation, Software Development Lifecycle, Code Maintenance, Application Enhancement
AI Coding Tools:	Claude Code (certified), GitHub Copilot, Cursor, ChatGPT
AI-assisted Workflow:	Prompt engineering for AI coding agents (Openclaw), AI-assisted code review & refactoring, unit test generation, debugging & log analysis, API documentation generation
AI Integration & Responsible Use:	Integrating LLM APIs (OpenAI, Claude) into backend services, structured JSON output, basic RAG & vector databases; reviewing and validating AI-generated code for correctness and security
Professional skills	Strong Analytical Skills, Problem Solving, Quick Comprehension of Existing Applications, Ability to Quickly Learn and Apply New Technologies

INTERESTS

- **AI:** Researching and following new AI models, tools and coding agents; trying them in personal projects.
- **Self-hosting:** Building home servers, setting up home/LAN networks and deploying my own web projects.
- **Single-board computers:** Tinkering with Raspberry Pi 4/5 and similar devices for self-hosted services and small hardware projects.

Others: soccer, guitar, traveling.

ADDITIONAL INFORMATION

I am well aware that programming work requires meticulousness, the ability to optimize source code and meet strict deadlines. For me, this is an opportunity to challenge myself, not an obstacle, thanks to the spirit of continuous learning.
